

Amendments to the Specification:

Page 2, beginning at line 23, please substitute the paragraph with the following:

In particular, operating tests have shown that the angle of departure must be between $+45^{\circ}$ and -45° and that the aforementioned radius of curvature must be in the interval between $[[0 \text{ mm}]] \infty$ (straight trajectory) and 500 mm.

Page 4, beginning at line 21, please substitute the paragraph with the following:

In accordance with tests carried out, it has been found that the angle of departure (α) must be between $+45^{\circ}$ and -45° and that the radius of curvature (R) must be between $[[0 \text{ mm}]] \infty$ (straight rail (7)) and 500 mm (maximum rail curve).
